-

COMPETITION EXPERIENCE

National Centers of Academic Excellence in Cybersecurity Competition (2026)

- Placed **2nd** out of multiple other teams in an 7.5 hour active Defensive situation against a **live** Red Team.
- Started, configured, and maintained the router and firewall for the team.
- Created custom firewall rules and exceptions to block Red Team IPs addresses and allow traffic for additional surprise services that became required during the competition.
- Worked within a team to create networks consisting of a Web Server, Database, DNS server, Router, FTP server, Backup server, and **10** Linux Virtual Machines.

CPTC Mock (2026)

- A mock competition exercise put on by the leadership of the club to simulation the experience of Global Collegiate Penetration Testing Competition.
- Worked within a team to preform a professional and documented penetration test against a mock company to expose any vulnerabilities and provide information to later secure those vulnerabilities.
- This was more of an educational experience than a real competition.

CyberPatriot National Youth Competition (2021)

- Lead a team of 5 classmates to place **2nd** in the state of Tennessee.
 - Preformed mock defensive measures on infected images for both Windows and Windows Server.
 - Ensured team was prepared for competition day, with both meetings and practice material.
-
